No. 351-1/2-1-1/2 - .146" x 1-1/2" Long. Each

No. 351-1/2-2 - .146" x 2" Long. Each

No. 364 - .125" x 1-3/4" Long. Each

KEYBOARD MATERIAL AND RECOVERING

SCHAFF MOLDED KEYTOPS

Here are the key tops that have revolutionized the key recovering industry. Easily fitted to most keyboards - can be filed for finishing to exact size. Extra thickness makes it possible to cover all imperfections in old keys, and insures against unevenness so often apparent when thinner key covering material has been used. It will be possible for you to cover many sets of keys with little or no final shaping. The beauty and durability of the finished keyboard will command a higher price. Produced in our own molds from acrylic plastic which is hard, scratch-resistant and durable. They will not discolor with age.

*UNIFORM COLOR GUARANTEED - MINIMUM SHAPING REQUIRED
LESS EXPENSIVE THAN IVORINE*

.075" THICK - ONE SET of 52 PER BOX

No. 1391 - Molded Keytops Without Fronts, Off White. Set

No. 1391W - Molded Keytops Without Fronts, White. Set

No. 1329 - Tail only. Satin Ivory Medium Color. Each

No. 1330 - Front only. Satin Ivory Light Color. Each

No. 1331 - Front only. Satin Ivory Medium Color. Each

PIANO KEY RECOVERING & REPAIRS

Key recovering increases the value of used keyboard instruments and makes them easier to sell. Let our Piano Key Shop recover your keys with Schaff's Plastic Molded Keytops either with or without fronts. We also replace sharps with either plastic or ebony and offer complete rebushing, and key button replacement. (We do not recover waterfall type keys, nor do we replace genuine ivory.)

Keyshop requests your removal of old ivory if you want to retain. When rebushing services are requested, please provide the diameter or a sample of key pin. Also, our shop will recover organ keys.

Before removing keys from the piano, number them between the key button and the capstan. The #1 key is the lowest bass and #88 would be the highest treble. This helps you when the recovered keys are to be reinstalled. Insure each set for \$2,000.00.

Pack the keys well. Use a strong carton or key mailing case (stock #2668 on page 87) and plenty of packing paper. Broken or lost keys are costly to replace and valuable time is lost. Ship via UPS to our key shop.

Our Piano Key Shop is located in Rochester New York. Sending your keys direct to Rochester will save time - but don't forget to send the order to our Lake Zurich office. The shop will not proceed with recovering until a work order is received from Lake Zurich. Address your keys to: Schaff Piano Key Shop, 55 Lois Street, Rochester, NY 14606. Send your order to: Schaff Piano Supply Company, 451 Oakwood Road, Lake Zurich, IL 60047.
