

Experienced System Installers Value Comprehensive Online Training!

Experienced installers appreciate the continuing education value of our Piano Life Saver online training program. When you take the six training modules, you will be engaged by thoughtfully-produced content, definitive graphics, and interactive learning technology which enables you to drill down to discover technical details or examine the steps of a process. Train at your convenience: view one or two modules at a time (20-30 min. each) and return later if you wish. The Certified

Installer exam is optional (1hr.) and can be taken an unlimited number of times.

To access the training: go to pianolifesaver.com Click on Technicians, login with user name: **piano.tech** Password: **only** Click on Certified Installer icon at top left on the home page.

Training builds confidence!

"I've been installing systems since the 70's, so I wasn't expecting to find much new information in your online training. I was delighted to find an informative and well-done process. Congratulations on such an innovative approach to training."

JOYCE MEEKINS, RPT

"Although I have installed Systems in the past and service them fairly regularly, I found the training very helpful in better understanding the System and its optimal use."

LARRY YOUNG, RPT

"The training has made me a more effective advocate for humidity stabilization, a more efficient, more informed installer in the field."

MICHAEL LAMKIN, RPT

"Although I've been installing Systems for years, when I took your online training, I was surprised to find how much I learned."

MIKE McCOY, RPT
